

BRUNS

BIBLIA Het Bijbels Belevingscentrum

The Bruges Bible Service has realised BIBLIA Het Bijbels Belevingscentrum in the historic building of the Grootseminarie in the heart of Brugge. A modern, interactive experience centre where thinking and doing reach out to each other. Visitors take a journey through the world of Bible guided by audio. The Bible responds to existential questions that people of all ages struggle with. BIBLIA translate the Bible metaphors into contemporary stories and incorporates them into varied interactions and poetic installations. Visitors will discover the contents of the Bible in several in-depth layers, inviting them to reflect on its origins and meaning today.

BIBLIA Het Bijbels Belevingscentrum

In cooperation with Bailleul design agency and CREATE, Bruns has realised the total exhibition of BIBLIA Het Bijbels Belevingscentrum. The realisation consists mainly of various wooden and steel furniture where interactive element have been implemented. The centre is also equipped with many information carriers with various content about the Bible. In it, a basic trail has been developed and in-depth scripture readings are also present, keeping visitors who want to learn more about the context of the world of the Bible captivated.

The integral furniture made of various materials such as; birch wood, Refelt, steel and glass are finished in high quality. The graphic is directly printed on these materials in large sizes. The space has free-standing walls and columns, on which all kinds of things can be experienced. These include rotating cubes, a starry sky, illuminated glass shelves and an interactive library cabinet.

Various constructions were carefully developed to fix all the elements without attaching them directly to the listed building. The accessibility for the disabled was in this very important.

BIBLIA is an experience centre for everyone to reflect on the origins of the Bible and its meaning today.
