

The VVV is the place to get inspiration for a holiday in Zeeland. You can find there all kinds of information about Zeeland, its attractions and accommodations (from hotel to camping and more). The staff knows the region like no other and are happy to give extra tips or inspiration for a unique holiday in Zeeland.

The new VVV inspiration point in Renesse opened on Tuesday 27 March 2018. The building is actually a small museum where people can get a quick first impression of Renesse and Zeeland.

The consumer of today has high demands on how and where he goes on vacation. He has already seen and done a lot, and wants to be informed in other ways. People do not want to just get a flyer anymore. They want to get inspired. Experience something. VVV Renesse thereon responded through various interactive exhibits that already tell a little more about the most beautiful places in the region in their own way. Of course, the flyers are still there and the tourists can always contact the staff behind the counter.

Renesse is after Domburg the second Zeeland Tourist Office that is arranged according to the new formula. The intention is that the other 16 branches will follow soon.
