

One Campus - One Barco

A fine example of modern architecture that underscores the innovative, international nature of Barco. A convivial campus that warmly welcomes Barco's (potential) customers, business partners and suppliers. And most of all: an enjoyable, inspiring and flexible work environment where Barco employees feel at home and where applicants would be delighted to work. The new Barco One Campus at the Kennedypark and Beneluxpark in Kortrijk, where Barco is centralizing all its Belgian activities, is all that – and much more besides.

The Barco Experience Center

The showpiece of the new Barco Campus is the new Barco Experience center where demonstrations run smoothly and inspiration flows freely. The place for customers and partners to experience Barco's latest technology in full interactivity.

The center gives you a unique insight into all of Barco's solutions and technological innovations, across markets and industries.

The Experience Center is built around how Barco solutions help people to enjoy compelling entertainment experiences; how they foster knowledge sharing and smart decision-making in organizations and help hospitals provide their patients with the best possible healthcare.

You'll find four dedicated demo pods for Entertainment, Enterprise, Healthcare, as well as customized demonstrations. It includes a 170-seat movie theater to showcase the latest audio and immersive cinema technologies, and offers a fully equipped restaurant and coffee corner.
