

The FIFA World Football Museum is the new home of football history. The museum preserves and showcases some of the most exciting artefacts in world football's rich heritage, making it a must-see for any fans of the game. It celebrates the rich heritage of football and the game's unique ability to connect and inspire people around the world.

The 1st floor of the museum is named 'Fields of Play' which illustrates the influence of the game on people, arts and culture and reveals how it both inspires and entertains. One of the highlights of this floor will be the Game corner and the newly created giant Pinball machine developed, produced and installed by Bruns.
