Location

Koksijde-Oostduinkerke, BE

Surface area

800m²

The NAVIGO Fisheries Museum in Koksijde-Oostduinkerke, Belgium, has been renewed. The museum is dedicated to local fishermen and their long, fascinating history. As a visitor, you will discover stories about miraculous fish catches during World War II, twelve-year-old boys risking their lives as Iceland sailors, the sometimes tough and lonely life of fishermen's wives, and much more!

A visit to the NAVIGO Fisheries Museum is a great experience for everyone. Young and old, families, and groups are warmly welcome to explore the fishermen's stories with or without a guide.

Bruns was the developer and producer of the renewed exhibition and coordinated the subcontractors. In collaboration with Madoc, CREATE.eu, Ata Tech, and the client, the project was successfully completed.

The exhibition includes various elements, such as seating benches, lounge benches, display domes in different sizes, a viewing box, a scale model, a timeline, different types of display cases, interactive tables with touchscreens, and decorative elements like a telescope.

It was an intensive process involving many different parties. Bruns managed the entire coordination and, as a full-service provider, completed the project according to the client's wishes and requirements.
