

Bruns has been given responsibility for part of the renewed entrance of the Maritime Museum Rotterdam. A large part of this is the large collection wall. In this wall collection pieces of the Maritime Museum are exhibited in different ways. In order to be able to view this collection, seating elements have been realized with fabric in the house style colour. Bruns has also realized a ticket and information desk with storage space in an oak wooden version. In addition, the shop is equipped with shop shelves, presentation tables and specially designed crane bins. Finally, the ceiling finishing, signage and, in cooperation with Ata Tech, the lighting fixtures were provided.
