BRUNS

Europe Experience

The Europe Experiences are established on the initiative of the European Parliament in cooperation with the European Commission. The purpose of the exhibition is to provide more insight into the people, history and politics of the European Union in a surprising and fascinating way. The visitor receives answers to questions in various ways. There are questions like: What is European policy? How works the European Parliament and how does they deal with 28 countries and 24 languages. The exhibition is designed in 24 languages, so that every European can experience the exhibition in its own language.

Bruns has developed, in cooperation with Atelier Brückner, the exhibition in various places. The exhibition consist of a lot of interactive elements. For example, take a seat in 360-degree cinema and experience a plenary session of the European Parliament. Or take part in a simulation game where you directly crawls into the role of a Member of the European Parliament or Commissioner of the European Union. The interaction and personal approach make it possible to explain the European Union in an interesting and accessible way.
