

Discover the wonderful world of water at Hidrodooe: fun – exciting – educational.

It is not a museum in the strict sense of the word but a real hands-on experience centre which fully involves visitors and even allows them to experiment. By experimenting with more than 80 mental and physical water-related displays visitors, and particularly children, can expand their knowledge of water. The Water Maker is displayed in the central section and shows all the phases that water goes to before it comes out of the tap is drinking water.

In Hidrodooe you can also experiment with water in the open air in the Blue Water Garden. Here you will find fantastic experiments such as the pump game, the water umbrella, the spring fountain and the hydraulic lift.

70 interactive exhibits

The Water World is the heart of the centre and is a place where you can do things and experiment.

The Drop – Step inside the Drop: come and sit on one of the bobbing waves and enjoy the magical multimedia show. It is an unforgettable experience for people of all ages.

The Water Zone – Enjoy exploring the What is Water Zone. Set off a hydrogen rocket or try out one of the amazing scientific experiments.

History Cave – Allow yourself to be carried into the History Cave and discover water's rich history.

Waterfall – Walk under the waterfall through the landscape in and find out about water's role in the world: a unique experience while walking through the hills and valleys, the desert and the city, to the immeasurable sea.

Aqua Station – Discover the future of water in the futuristic Aqua Station. Take a seat in the commander's chair and take up the challenge of confronting an intelligent but stubborn on-board computer.
